Who will receive the award in 2022?

Apply now!
EuroTest-Award

EuroTest-Award 2022

for outstanding achievements in occupational health and safety

The EuroTest Cooperation product safety can be planned

The EuroTest cooperation was founded in 1996 and has since been a pioneer for harmonized safety-related processes.

Our most important goals

- Alignment of safety-related requirements in the field of product safety
- Mutual support
- Recognition of the test results and thus an alignment of the safety standards

These requirements are implemented in the products by means of safety tests. As a rule, this is done at a very early stage of product development and in close cooperation with the parties involved. The results benefit those who manufacture or use the products, an approach to prevention that has proven its worth.

„The Award goes to...“

The EuroTest-Award will be awarded during the bauma at the BG BAU reception on Tuesday, October 25, 2022.

The Award

The award recognizes outstanding achievements in the field of occupational and product safety for the construction industry.

With their ideas, the award winners represent a wide range of initiatives and developments for tomorrow's work.

The entries are evaluated according to the following criteria:

- How are the effects on the improvement of occupational safety to be assessed?
- Is the proposal a new approach or design?
- What is the ratio of benefits to costs of the measure?
- Is the proposal applicable to other companies?
- Is the measure effective in the long term?

You can download the **application documents** from the BG BAU website or request them by E-Mail. Apply with a presentation of your technical innovation **until 01.08.2022**.

bauma

With certainty

your partner

As a DGUV Test Testing and Certification Body, we support companies that manufacture, import or operate products in the construction industry.

These are our goals:

- Holistic prevention
- Safety in compliance with applicable legislation in the manufacture and operation of machinery
- Highest safety level for certified machines
- European and internationally harmonized requirement profiles as a basis for testing
